Recruitment Committee
Rwanda ICT Chamber

Subject: Application for Enumerator – Digital Economy Skills Survey

Dear Recruitment Committee,

I am writing to express my interest in the Enumerator position for the Digital Economy Skills Survey, organized by the Rwanda ICT Chamber in partnership with the International Labour Organization. As a final-year Software Engineering student at Adventist University of Central Africa, I bring a strong combination of technical knowledge, communication skills, and field experience that makes me well-suited for this assignment.

Through my academic journey and practical projects, such as developing a community savings and lending platform (Aguka Project) and designing database solutions for the Police Examination Process Project, I have built strong problem-solving, collaboration, and data management skills. Additionally, my experience as a student government leader has strengthened my ability to engage diverse groups of people with professionalism and empathy.

I am fluent in Kinyarwanda and English, highly detail-oriented, and comfortable working independently under minimal supervision. Most importantly, I am committed to ensuring accuracy, confidentiality, and professionalism when collecting and handling survey data.

I am confident that my background, passion for Rwanda's digital transformation, and ability to engage with companies in a respectful and professional manner will allow me to contribute effectively to the success of this survey.

Thank you for considering my application. I would be delighted to contribute to this important initiative and look forward to the opportunity to support the Rwanda ICT Chamber in advancing decent jobs for youth in the digital economy.

Sincerely,
Uwizeye Ngoga Sandra
