

UWIZEYE NGOGA SANDRA

Kigali, Rwanda | uwizeyengogasandra@gmail.com | 0782413479

PROFESSIONAL PROFILE

Detail-oriented IT and communication systems enthusiast with a strong foundation in networking, software systems, and infrastructure support. Experienced in developing and maintaining enterprise applications and eager to transition into communication systems, radio networks, and telemetry environments. Strong troubleshooting mindset with the ability to work in demanding operational environments.

CORE COMPETENCIES

- Networking: TCP/IP, VLANs, VPNs, LAN/WAN, Wi-Fi, basic fiber optics
- Communication Systems: Basic understanding of UHF/VHF radios, antennas, repeaters
- Systems: Linux & Windows server basics, system troubleshooting
- Data & Tools: SQL, Excel, dashboards, Git, Docker (basic)

PROFESSIONAL EXPERIENCE

Academic Intern – Rwanda Revenue Authority (RRA) | 2025

- Supported development and maintenance of enterprise systems
- Assisted in troubleshooting and system performance optimization
- Worked with backend/frontend integration and deployment processes

PROJECTS

- Online Quiz Platform with authentication and analytics dashboards
- Police Examination System using PL/SQL
- Aguka Platform (UI/UX-focused system)

EDUCATION

BSc Software Engineering – AUCA (Ongoing)

CERTIFICATIONS

- Cisco Networking Essentials
- Networking Operations & Systems Management

ADDITIONAL SKILLS

- Strong troubleshooting ability
- Clear documentation and communication
- Willingness to work in field environments and travel

COVER LETTER

Dear Hiring Manager,

I am writing to express my interest in the role focused on IT and communication systems operations. My academic background in Software Engineering, combined with hands-on experience in networking and system troubleshooting, has prepared me to contribute effectively to environments that require reliability, precision, and strong technical foundations.

During my internship at the Rwanda Revenue Authority, I worked on enterprise systems where reliability and performance were critical. I developed practical skills in diagnosing issues, supporting deployments, and ensuring systems operate efficiently. Alongside this, I have built a solid foundation in networking concepts such as TCP/IP, LAN/WAN configurations, and system monitoring.

I am particularly interested in expanding my expertise into communication systems such as UHF/VHF radio networks, telemetry systems, and infrastructure used in operational environments

like mining or remote sites. I am highly adaptable, safety-conscious, and willing to work in field-based conditions that require both technical skill and resilience.

I am eager to bring my problem-solving mindset, technical curiosity, and commitment to learning into your team. I would welcome the opportunity to contribute and grow within your organization.

Sincerely,
UWIZEYE NGOGA SANDRA
