

UWIZEYE NGOGA SANDRA

Developer Advocate / Software Engineering Student

Profile

Early-career Developer Advocate and Software Engineering student with a strong foundation in cloud fundamentals, networking, Linux systems, and application development. Passionate about building and demonstrating real-world technical solutions, creating clear technical documentation, and supporting developer communities in adopting scalable and locally hosted cloud technologies.

Education

Bachelor of Science in Software Engineering
Adventist University of Central Africa (AUCA), Kigali, Rwanda
GPA: 3.5 / 4.0 | June 2022 – Present

Experience

Academic Intern – Rwanda Revenue Authority (RRA)

March – May 2025

- Participated in an internally guided software development project, contributing across all phases of the Software Development Life Cycle (SDLC).
- Took part in requirements understanding, system design discussions, implementation, testing, and deployment activities under supervision.
- Worked with structured data and basic system components while learning best practices in documentation, version control, and team collaboration.
- Engaged with experienced engineers to understand real-world enterprise systems, workflows, and operational constraints.

Projects

Online Quiz Application

- Developed a role-based web application with user authentication and analytics dashboards.
- Implemented structured data storage and reporting using SQL queries.
- Designed the system with scalability considerations relevant to cloud deployment.

Aguka Platform (UI/UX)

- Designed user-friendly interfaces to improve accessibility and collaboration.

Police Examination Management System (PL/SQL)

- Built a database solution to manage driving license examination processes efficiently.
- Supported data validation, reporting, and process automation.

Training & Programs

Solvit Africa – Code to Connect Program (June – September 2025)

- Training in UI/UX design, soft skills, AI fundamentals, and generative AI tools.
- Gained hands-on experience with prompt engineering and collaborative project work.

CMU CS Academy Online Course

- Learned Python programming fundamentals and participated in an international creative task competition.

Technical Skills

- Programming: Java (Spring Boot), Python, SQL / PL-SQL
- Cloud & DevOps: Docker (basic), CI/CD concepts, Linux fundamentals
- Networking: Networking operations, system troubleshooting
- Tools: Git, GitHub, Microsoft Word, Excel, PowerPoint
- Data: Excel (pivot tables, formulas), basic data analysis and visualization

Certifications

- NETOPS 2 – Networking Operations and Systems Management
- Cisco Networking Essentials
- Introduction to Network Operations (2024)
- UI/UX Design
